MUNICIPAL REGULATIONS.

FOR PAYMENT OF BILLS AGAINST THE CITY.

All persons furnishing materials or service for the city, or aid to the city poor, should be particular to take the name of the person ordering such service, material, or aid, and should *know* that the person is duly authorized to contract such liability.

The city will not be holden for merchandise sold or delivered on city poor account, except on the written order of the overseer of the poor, and for no longer time than until his successor shall have been appointed and qualified.

Duplicate copies will be required of all bills payable by the city, furnished on county poor account.

All bills against the city must be approved by the person authorizing the charge; and unless this is done, no action can be had upon the bill by the Committee on Accounts and Claims, and no order will be given for its payment.

Bills so certified should be left with the city clerk on or before the second day of the month.

If approved by the Committee on Accounts and Claims, they will be ready for payment on Thursday following the regular monthly meeting of the city government.

The regular monthly meetings of the city government occur on the second Monday of each month.

HENRY E. CHAMBERLIN,
City Clerk.

MAYORS OF CITY OF CONCORD.

The original charter of the city was adopted by the inhabitants March 10, 1853, and until 1880 the Mayor was elected annually. Since 1880 the Mayor has been elected for two years at each biennial election in November. Under the City Charter, adopted May 11, 1909, the Mayor was elected in December, 1910, for one year, and biennially thereafter in November, beginning in the year 1911.

REPORT OF THE BOARD OF EDUCATION.

The Board of Education, in presenting its annual report, records with much regret the resignation of Hon. Edward C. Niles, a member of the board since July 6, 1909, and president of the board since April 8, 1913.

For months the world has been and is now making history rapidly, and we are living in a period of reconstruction, so-called, brought about by the ending of a World War. In a recent speech delivered in New York City by General Leonard Wood, his strong appeal was for one Flag and one Country, advocating that no tongue but English be taught in the elementary schools, and favoring nation-wide recognition of the need of higher salaries for teachers in our public schools, as the men and women teachers in our classrooms are responsible for moulding the thought and welfare of the future American citizen.

At a recent meeting of the Board of Education, they voted unanimously to raise the pay of all teachers in Union School District \$250 per annum, \$100 of the increase to be paid this year.

The large amount of sickness prevailing, from the influenza and other causes, necessitated the discontinuance of the schools for four weeks. A closing of such duration, which has not occurred for a number of years, placed upon the superintendent, teachers and pupils the responsibility of making up time lost, as far as possible, in order to complete the course of study for the year.

Three weeks of the enforced vacation will be made up and, to help accomplish this, the Board of Education has voted to continue the schools an extra week in June, closing on June 27, 1919.

There is now before the State Legislature a very important Educational Reform Bill, providing for central supervision of all schools, the establishment of standards for

teachers, schoolhouses and school organizations, the establishment of Americanization schools for the exclusive use of the English tongue. This is a broad and up-to-date educational bill, the passing of which will place the burden of additional taxes on the cities and the larger communities. This increased financial burden will, no doubt, be met cheerfully by the taxpayer, as the American people are very generous in their support of the public schools.

With larger salaries for the teachers, recommended by the Board, with the increase of the price of coal and the growing cost of all supplies, the amount of money to be raised at the coming annual school meeting will be about \$20,000 over the budget of last year. The responsibility for good schools must be shared by every taxpayer of Union School District. The Board of Education, as your representative, feels this responsibility and, consequently, is asking for larger appropriations, to enable them to hold the schools of Union School District up to the high standard that has prevailed in the past, and keep pace with the progressive methods which are now demanded for the future.

Respectfully submitted,

REPORT OF THE SUPERINTENDENT.

To the Board of Education of Union School District:

School history in Concord for the past year has been unusually varied. The continuation of the War taxed the resources of our schools but the demands have been met invariably with a free and loyal spirit by officials, teachers and pupils in a way second to that of no other public organization. The coming of peace bids fair to call for revolutions and readjustments in former systems that must change their scope and purposes for the better. With confidence in continued prosperity I am submitting to you my thirty-fourth annual report which is also the fifty-ninth of its series.

Educational forecast at the present time lies along constructive lines. What are regarded as serious defects in school requirements have been laid bare by experiences and investigations growing out of the World War and they are to be met by remedial legislation. According to Charles W. Eliot these faults seem to converge to a centre in the inability of school graduates of all courses, more particularly the classical courses, to sense with the accuracy necessary for a clear description. The period just passed dwelt distinctly upon the strictly mental studies—history, literature, philosophy, and language. War reports show that many of those who confined their efforts to such studies were helpless before tasks which called for manual skill or the application of science and art. In an appreciable degree, and in the order named, the college, the secondary school, and the elementary school have to bear this responsibility. It remains for the educators of this period and the next to find a remedy. The all-round education will seek bodily as well as mental vigor, bodily as well as mental skill. The sciences and the manual arts must get fuller recognition and better conveniences for carrying them out, while school officers

who fail to provide for such instruction for all pupils will be recognized as having passed their usefulness in educational fields. The schools and administrators of the past have been too much impressed with ideality to be practical enough to meet the needs of a rapidly changing population.

Divorcing the requirements of common life from the requirements of the so-called cultured courses is in conflict with the fundamental principles of democracy.

The general inclination of parents to shield their children from even a reasonable amount of manual labor and severe application is often as disgusting as it is disastrous.

There ought to be no good reason for not offering children the chance to attend school all the year round, it being far better that some should be in school advancing in their studies than inviting danger to life from accident and disease in long enforced vacations.

There ought to be no good reason why every girl attending secondary schools should not be offered instruction throughout her course in the affairs and necessities of common life embraced under Domestic Arts, and every boy in Mechanic Arts.

A six-hour day for secondary school students is not too long, the time being divided between their chosen curriculum and Domestic Arts and Mechanic Arts in the ratio of about one and a half to one.

I may call your attention to the trend of educational forces which is in evidence today—as marked in our own state as it is in the nation at large. The educational bill before the state legislature should be read by every one. Its excellent features have such a far-reaching influence that their object can merit no criticism. This also applies to the Smith-Bankhead bill now before Congress.

Just as significant is the preliminary report of the committee on College Entrance Requirements appointed by the New England Association of School Superintendents which strongly recommends a much larger freedom to secondary schools in planning their college preparatory courses and the modification of college entrance requirements so that a

fair measure of intellectual ability and maturity of purpose may be determining factors for entering these institutions.

The National Bureau of Education is concerned with readjustments shown to be necessary by experiences in the war and we may confidently expect a more rational scheme of education than has been in practice before.

ATTENDANCE.

There have been fewer pupils in the public schools this year than last and without doubt the population of the city has decreased. When the tide will begin to turn the other way cannot be told but it may be predicted with some confidence that, with the return of peace conditions and better adjustments in the industrial world, a steady growth will come. All the usual means of keeping up the enrollment have been used. The loss has been most apparent in the higher grades.

The schools have not been closed on account of bad weather but in October they were discontinued four weeks because of the epidemic of influenza then raging. All through the year there has been much absence on account of sickness.

A large number of labor certificates have been taken out. The school census, which had been delayed in the taking by health and labor conditions, shows an increase in the number of school children just under school age.

THE WORK OF THE SCHOOLS.

The Senior High School has suffered seriously from a changing corps of teachers; so seriously that it has been difficult to keep conditions normal. Although, in this perplexity, it has been well nigh impossible to maintain the former standards of scholarship, we hope to return to them as soon as the country becomes used to changing conditions.

Variation in the curricula of studies has been confined to the introduction of Spanish, the adoption of optionals in Domestic Arts, and to carrying out the requirements of the Smith-Hughes Act of Course IV.

The Parker School has suffered less from changes, the work being affected in a like degree. The new classes in elementary science and in Civics are interesting and do fine work.

The Chandler, Walker, Garrison, and Eastman Junior High Schools retain their former standing.

The two groups of high schools are in every way to be commended for their serious efforts and good results.

The elementary schools have suffered by continued absences of both pupils and teachers. These schools, furnishing the foundation for excellent work in the higher grades, are not taken seriously enough by the average citizen but to pass them and their teachers by without comment would be unjust and not in keeping with the importance of their part in our educational plan. They are strong in method and in effective work. The advance in every study is noticeable. Proficiency in reading even in the first year is quite surprising. It is not uncommon to find third grade children able to read intelligently the daily news and sometimes this is true of second grade pupils. The course of study is being revised. One of the most important features will be more attention given to "Good Citizenship" which will begin in Class A and extend through the succeeding grades.

The character and the scope of the requirements of the Morrill School of Mechanic Arts now conform to those of the Smith-Hughes Act as interpreted by the State Department of Public Instruction. After vexatious delays, the course embracing electric wiring, motor construction, etc., has been installed and seems to be progressing satisfactorily. The installation of this course has been in accord with the spirit of modern progress and the additional cost is partly met by our proportional part of federal aid. The War classes were continued the required time and what they have done is fully set forth in the principal's report.

SCHOOL BUILDINGS.

No repairs of an extensive nature have been made to the buildings for the past year. The larger items have been the re-tubing of the high school boilers, painting the rural school buildings, and a new coil for the Parker School.

The usual plan of putting one building in first-class repair each successive year was omitted because of the scarcity of labor and the high cost of material. I believe this policy of putting off the needed repairs to be inadvisable because some buildings need them badly. Keeping the buildings warm at a reasonable cost is a difficult problem at the prevailing prices for fuel. The effect of an unusually mild winter has been of great help in keeping down the expense and much fuel will be left over for next year's supply.

TRANSPORTATION.

This particular feature of school administration appears to be a distinct reality in this district, perhaps to a greater extent than in many other places. It has been quite carefully carried out notwithstanding the fact that there is no mandatory legal statute governing it. The various routes have been maintained at a reasonable expense and as a general thing the people have been satisfied with the accommodations offered. If such conveniences have been withheld, it has been because nobody could be found to do the work except at rates which seemed extortionate. Discontent has been manifested when pupils, who were being transported to Elementary Schools and the Junior High Schools, graduated, thus ending the privilege of being carried. Others evidently think that the teams should come to their doors else they are being discriminated against. Happily there are not many such cases and the large majority are reasonable and uncomplaining.

The following changes in the routes have been made this year:

Old Routes Discontinued.

1. From "Break O'Day" to Harriet P. Dame School.

2. From Broad Cove to Riverhill.
3. From Black Hill to Harriet P. Dame.

New Routes.

1. From Iron Works District to Chandler School.
2. From Black Hill to Penacook, Cogswell, Rumford and Chandler Schools.

RURAL SCHOOLS.

The rural schools have not been so well attended as they were last year principally on account of regrading from eight to seven years. The shortage has been more apparent in the schools most remote from the city proper. There seems to be but little prospect of a larger enrollment either at Riverhill or at the Mountain. If decrease continues, the question of transporting the pupils to other centres will come up as an economic measure.

The work of all these schools has shown a steady increase in power and when the lower classes have passed through the preparation given in the succeeding grades even better results will be gained. Six graduates of the Iron Works School and two from Riverhill entered the Chandler School in the fall. Sewing, drawing and music have been put in during the year thus giving these schools the benefit of special work they have not had before. Cooking is taken up in connection with the noonday meal. Boys from the Iron Works and the Millville schools take the woodworking course in the city proper. The rural schools need better heating facilities. Much inconvenience is experienced by smoke issuing from long, cold pipes. I also recommend that they be fitted up with movable school furniture so that spare room may be had for general exercises. The furniture now in use can be made available for rooms where such advantages are furnished by the school hall.

NIGHT SCHOOLS.

Night schools have been conducted as usual. The class for Non-English speaking people has been in charge of Mrs.

Putnam a successful, experienced teacher. Unusual efforts were made this year to secure a better enrollment but to little avail. The mechanical drawing class under Mr. Taylor is made up of working people who represent staunch American citizenship. They are enthusiastic and studious. No tabulations are given because both schools are in session at this writing.

WAR ACTIVITIES.

Of the various organizations supported by the public, the schools seem to be called upon to the extent of their ability about all the time. In time of war they are made use of by all the different agencies to help along the cause. They respond nobly and they ought to. In times of peace every variety of commercial enterprise is constantly seeking their strength as an advertizing medium. Often the methods used to circumvent the rules of the district are pernicious and persistent. It is always well to guard the schools against such encroachments else the standard of work will become so low as to fail of realizing on the time and money spent for their betterment.

WAR SAVING STAMPS.

Since January 5, 1919, the pupils of the schools have caused to be sold \$11,441.16 in thrift stamps. The tabulation in the Appendix I speaks for itself. I am not aware that this record has been surpassed in the state.

PATRIOTIC SONGS.

All the schools were asked to incorporate in their usual morning exercise a song of decidedly patriotic flavor. This has resulted in a patriotic spirit revealed by song that has not been so apparent since the times of the Civil War. The songs most used are: "The Star Spangled Banner," "The Battle Hymn of the Republic," "America," "Keller's American Hymn," "Keep the Home Fires Burning," "There's A Long, Long Trail," "Hurrah for Old New England," and others.

In this particular I may refer to the work of the Parker School as model. Neither the loss of school time, extra effort, nor want of material has dampened ardor in this work, and the school, the city, the state and the country have been all the better for it.

SCHOOL GARDENS.

The call of the United States Government for school gardens was taken up by the pupils and the teachers with a vigorous and spirited response. The gratifying results reflect great credit upon all concerned. Exhibitions were conducted in various buildings giving additional evidence of the enthusiasm with which all phases of war work have been accepted by the schools.

OBITUARY.

Arthur Winkley French died at Wentworth Hospital, Dover, N. H., October 10, 1918, after an illness of short duration. Mr. French was called to the Morrill School of Mechanic Arts as an assistant instructor on May 10, 1909. Upon the resignation of Mr. Carroll, principal, he was chosen to fill his place, July 6, 1909, a position which he held up to the time of his death. On taking charge he set about raising the standard as well as the scope of the work and persevered until he brought it to such a state of perfection that it was favorably known not only in New Hampshire but also throughout the country. He saw the school grow from one of three teachers and three hundred eighty-two students to one of seven teachers and four hundred fifty-six students. He spared no pains to fit himself for his position, attending the best University Summer Schools where he took courses in the various lines of work, even professional courses in the principles of teaching and administration. He conducted successful summer schools in our city, spoke at many of the Teachers' Institutes conducted by the State Department of Public Instruction and also Summer Schools at Plymouth, N. H. He found time to interest himself in the civic life of our city to quite an

extent. In the early spring of 1918 he was given a leave of absence for a year to assist the United States Shipping Board as instructor of war classes in which he was eminently successful. His untimely death is mourned by many friends, his influence upon the rising generation of our city is sadly missed, and the school has lost the uplifting influence of an energetic and unusually gifted young man.

PHYSICAL TRAINING.

For a number of years I have recommended legislation regarding the better physical training of public school children in this city. To show you how this is being taken up in other places I may call your attention to the laws passed in the following states since 1915: Illinois, New York, New Jersey, Nevada, Rhode Island, California, Maryland, and Delaware. Others are now giving it serious consideration.

The aims and purposes of these laws vary in the different states but in general they aim:

“To gain the development of organic vigor through nervo-muscular training.

To promote mental and bodily poise.

To correct postural defects.

To secure co-ordination, strength and endurance.

To promote the value of co-operation, self-subordination and obedience to authority.

To secure higher ideals, courage, and wholesome interest in recreation.

To secure better hygienic conditions in the school and the house.”

In our city I call your attention to the poor results from tests given from time to time by Miss Dickerman in the Parker School; the testimony of the school nurse; my own observation of pupil violation of hygienic rules, the many bent forms and few examples of erect carriage as things to be directly touched upon by a course in physical training. Aside from these I should expect strong action to be taken

toward giving pupils clear ideas in regard to the following things about which they get no direction except from ignorant and unthinking parents:

The dangerous exposure to weather from scanty clothing most of which is caused by attempt to realize the extremes of modern fashion; the prevalence of high heels to shoes which must some day bring untold misery to the wearers; the steady stream of children attending the moving picture plays, many going there directly from school when they should be out in the open filling their lungs with fresh air instead of filling their young minds with situations and actions so extreme and vicious as to be frequently repulsive even to adults.

In view of all these things I believe that some movement should be inaugurated to counteract such evils as much as possible in the rising generation and I feel this concern so strongly that I ask for a first class physical instructor who is professionally capable of looking after pupil health in all its various phases, and of administering a well-thought-out plan for the entire student body not the chosen few of athletic teams. If such a plan were in successful operation we should not only have healthier children but the problem of strong athletic teams would be much more easily solved. From such instruction I should expect:

A better general scholarship.

A more wholesome respect for authority, for religion and for the home life.

A higher standard of morality.

A quicker response in cases of national emergency.

In conclusion I may say that the future of the public school was never brighter than it is today. Events of the last four years seem to have aroused the people of this country to a realization of the importance of maintaining a school system that has proved itself to be the foundation of national democracy and a true safeguard of personal liberty.

The Americanization of our foreign population will mark

an advancement so beneficial that we are all wondering why it was not done before. If the public school is to represent our national aspirations and guarantee our national security it must receive every incentive to become more effective. A part of the revenue which hitherto has been given to the debauchment of mankind through the use of liquor can well be used in giving poor boys and girls help in their endeavors to reach a higher plane of existence through the education given in advanced institutions of learning. It can be used to get better equipment for rooms, better salaries for teachers, better trained teachers for the poorer country districts and in improving the health conditions. The effects of teaching temperance and right living in the schools has been shown conclusively by our part in winning the World War and in the adoption of the eighteenth amendment to the Constitution. The frequent lessons in hygiene, which revealed the noxious effects of the misuse of alcoholic beverages upon mankind, given day after day in all grades of public schools throughout this country, was the factor which was needed to bring about the solution of the prohibition problem. This crystallized public opinion and created a sentiment against the evil. For this thing alone the schools should be given better privileges and the public school teacher should be accorded a place in society inferior to that of no other person.

Still retaining a consciousness of the value of assistance in my work I extend cordial thanks to your honorable body, the teachers and all other citizens interested in public education, for the help given me during a trying year.

Respectfully submitted,

L. J. RUNDLETT.

REPORT OF THE HEADMASTER OF THE HIGH SCHOOL.

Supt. L. J. Rundlett, Concord, N. H.

DEAR SIR: Enclosed you will find a report of the work of the Senior High School for the year, February, 1918—February, 1919.

Attendance.

The attendance this year has been smaller than it was during the previous year. The total enrollment for the first semester was 461 which includes postgraduates and special students. Of the undergraduates in regular standing there were enrolled 456.

Graduation.

The two classes graduating in 1918 numbered 117. The class of January, 1918, had thirty-nine members and the class of June, 1918, had seventy-eight members. In this latter class diplomas were granted two young men who had entered the service of the United States before completing their courses. The class graduating in February, 1919, contained thirty-seven members. One diploma was granted a young man who had enlisted in the navy during the summer. These classes have followed the custom established by previous classes of giving a present to the school before their graduation. The class of June, 1918, gave a picture of President Wilson and the class of February, 1919, gave a statue of an American soldier, entitled "Captured but not Conquered."

Military Drill.

Since the war opened many things have transpired to interfere with the work done in military drill. For one thing, we have lost several instructors and at times have been without an instructor at all. This has naturally inter-

ferred with the interest in the work. Another thing that has prevented enrollment has been the cost of the uniform. The gray uniform which has been worn by the cadet companies of the past has almost doubled in price. This has prevented some from joining the company. At the present time we are considering changing to a uniform more reasonable in price and hope to be able to bring the work in military drill back to its previous standing. On account of the crowded condition of our recitation program at present it is necessary to have military drill come after the close of the school session. I do not know whether under these conditions it would be possible to make drill compulsory again or not. If it can be done I think it would be better for the success of the department. The work in military drill is the only thing that we have in school approaching regular physical exercise which can be continued throughout the year. On that account I think it would be a good thing if all the boys were obliged to take part in it.

The second annual Albin Prize Medal Contest was held on June 14, 1918. Sixteen students entered the contest and the medals were won by Nina G. Ramsay and Haskell H. Cohn.

During the fall term the usual Mothers' Meeting was held. The speaker for the afternoon was Dr. Marion Kerr of Boston.

During the first semester of this year we have suffered many interruptions in the school work due partly to the influenza epidemic and also partly to sickness and loss of teachers. In some departments the interruptions for this reason have been considerable. This has naturally increased the work of the other teachers and has prevented us from accomplishing all that we had hoped to do during the year. I feel, though, that when all conditions are taken into consideration we can say that the work as a whole has been satisfactory.

One new subject was started this year, the study of Spanish. We have now thirty-six students enrolled in this course with a prospect of an increase in another year.

Our Mechanic Arts course has been changed to meet the requirements of the Smith-Hughes act. This gives the boys more shop work and allows less time for academic subjects.

In Courses I and II a little wider range of electives, particularly along the line of household arts, has been allowed. These changes have been neither extensive nor radical and have only been made when it seemed that they would benefit the students.

Respectfully submitted,

CHARLES F. COOK,
Headmaster.

REPORT OF THE SUPERVISOR OF DRAWING.

Mr. Louis J. Rundlett, Superintendent of Union School District, Concord, N. H.

SIR: An exhibition of drawing was held in June, 1918. The elementary classes showed excellent quality in many varieties of work. Neatness and accuracy were noticeable. One of the best features of the exhibition was the lettering. Measuring exercises for use of the ruler are given in all grades. Classes of the High School Domestic Arts Course contributed drawings and designs similar to those which have been exhibited before. The house plans made by the girls of Class U under the instruction of Mr. Taylor and the books of illustrated compositions on house decoration with which Class V completed its course were very interesting. The number of High School pupils from other courses who could spare time for elective drawing was smaller than usual last year, so less of that kind of drawing could be exhibited.

As part of the study of house furnishing, Class V of the Domestic Arts Course visited a furniture store and were shown examples of all kinds of floor-coverings and learned the differences in the weaves of carpets.

Inspection of work at the end of the semester, February first, showed that the unusual number of absences of pupils and teachers since September first has had an effect on the work of this department. Some of the problems were omitted. The quality of the work done is as good as usual.

Respectfully submitted,

FAITH C. STALKER.

REPORT OF THE DIRECTOR OF SEWING.

Mr. L. J. Rundlett, Superintendent of the Union School District, Concord, N. H.

Following is a report of the work accomplished in the sewing department for the year 1918-1919.

In September, 1918, a great change was made in the course and the methods of teaching it. The children have done well, both in adapting themselves to the change and the work accomplished. To begin with, all "model work" has been done away with, and the stitches are applied to some problem for the child's personal use. This, which is a necessary part of home-making to-day, arouses interest and enthusiasm in the work rather than a dislike for sewing,

A very brief outline of the course may be of interest here:

First Year. A knowledge of the stitches, their uses and how to do them.

Second Year. Perfecting of stitches learned the first year, simple cutting and garment construction with problems such as (1) making a placket, (2) putting on a band, etc.

Third Year. Machine stitching, instruction in the use of commercial patterns and more complex garment construction.

Fourth Year. The fundamentals of sewing having been learned, the time is given over to the making of waists, skirts and dresses and simple millinery. The decoration or trimming receives much attention, that it may be simple, in good taste and conform to the color and lines of the garment and the wearer.

The practical side of the course, as such, ends here. Elective sewing is held in the Senior High School, but the class is a mixed one; that is, some have followed the work through the previous years and others have done practically

no sewing, consequently, a prescribed course cannot be followed. The fact that the only available time for this work is after school hours, is a great drawback to the size of the class.

Work for the Charitable Society is done and furnishes problems otherwise not presented; such as, the making of a boy's blouse.

Textile study, comparison of home-made and commercial garments, and talks on the manufacture of cloth fill in the course and teach the child how to buy cloth, so that full value of the money spent may be received.

Respectfully submitted,

B. LILLIAN BARKER.

REPORT OF THE SUPERVISOR OF LUNCHES.

Mr. L. J. Rundlett, Superintendent of Schools.

DEAR SIR: The work of the School Lunch Department has been much increased this year by the Food Conservation Regulations, which necessitated the sending of reports to the State House, the use of wheat and meat substitutes, and the use of sugar certificates. The shortage of sugar was one of the most difficult problems to be met as children require more than older people.

We were able to cope with the high prices of eggs through the purchase of a great many in April which were preserved in water glass.

Although the prices of materials have increased to a great extent, the prices of the lunches have not been changed. For five cents one has a choice of soup with toast, two sandwiches, cocoa or milk with either a muffin or a sandwich, a meat or a meat substitute, mashed potato and muffin, salad or desert.

The students worked under a great disadvantage owing to the epidemic, to war conditions and to the changing of teachers in this department.

It has not been necessary to add a great deal to the general equipment this year.

As special work, this department conducted a food sale for the benefit of the Red Cross at the Streeter Garden, prepared the refreshments for the parents' meetings and the lawn party which was given at the Parker School for the benefit of the Red Cross, and assisted the Girls' Club several times in a similar manner.

The aim is to give the students a practical knowledge of cookery while furnishing a wholesome, nutritious, and well balanced lunch at the lowest possible cost.

Respectfully submitted,

HARRIET B. DAVIS.

REPORT OF THE TEACHER OF COOKING.

Mr. L. J. Rundlett, Superintendent of Schools, Concord, N. H.

DEAR SIR: The work of the cooking department at the Parker School for the past year has been conducted along two lines:

1. Preparation of the Lunches. The food for the school lunch has been prepared entirely by the students, the major part of the work having been done by the Parker School girls. Two classes for each morning in the week have been scheduled for cooking, each class having one and one-half hours for the work.

2. Instruction of Elementary Classes. The work of the elementary classes has been divided into three parts: theory, practice, and recitation. These classes meet in the afternoon, and come from the Chandler, Walker, St. John, Sacred Heart, Eastman and Garrison Schools.

The aim of the course is to give the students a knowledge of the simple foods, the general procedure for their preparation, and the serving of them.

Respectfully submitted,

MYRTLE FARRAR.

REPORT OF THE SCHOOL NURSE.

Mr. L. J. Rundlett, Superintendent:

DEAR SIR: Dating from my appointment September 9, 1918, as acting school nurse, during the leave of absence granted Miss Elizabeth Murphy, R. N., and handicapped at the beginning by the closing of schools during the epidemic of influenza, I feel, in the comparatively short time I am not prepared to make a very extensive report.

It has been most difficult to pick up the work which has been carried on for several years by one person, without making a material change which might seem more complicated to those in co-operation.

The teachers have undoubtedly been called upon more often than usual this year, as it is mostly through co-operation with them I have attained an insight into the routine of the work and I wish them to feel my indebtedness toward them.

Child welfare today is a nation-wide problem and most interesting, but the school population of this city is too large for one to be expected to look after, going into detail as should be done.

If a school physician, which to me seems the first solution of the welfare of the child, cannot be obtained, then at least an assistant would be most valuable.

So far I have found no fund which is available in aiding those children from homes in straightened circumstances.

The physicians have done a great deal of charity work in this line, but due to the fact that so many have entered the service since the outbreak of the war, the demand for those left, especially since the start of the epidemic, has been so great, that their physical endurance has been taxed nearly to the limit, and I have not felt like taking too much of their time from their much needed rest.

Perhaps I might say that the cases I mostly refer to that need financial backing are the cases of crippled and deformed children, which it takes a matter of months to correct, but can be successfully done were there means of aid.

I feel most grateful toward the parents in the interest and prompt response they have taken in defective vision of the child.

Defective vision is the greatest drawback to the child. It cannot be expected to do the work the normal child is doing and then the question arises, "Why is not the child doing better work?"

Again, a fund is needed from which we can draw to furnish glasses for the children who otherwise could not have them.

Mr. Dexter deserves special credit for the interest he has taken in the children. A 10 per cent. discount has been allowed on each pair of glasses bought by the parents, with which I have already been able to furnish five pairs of glasses.

The dental clinic has been carried on most successfully this year. Although the city has lost one of its dentists in the past year, the others most willingly substituted his Saturday afternoons.

Miss Anderson is adding one more year of conscientious work, as assistant at the clinic.

I greatly appreciate the co-operation which has been given by the Board of Education, you and the teachers.

During the eighteen weeks of this school year I have made 162 home calls for the following conditions:

Defective vision,	79
Defective teeth,	52
Throat and nose conditions,	12
Pediculosis,	21
Uncleanliness,	10
Malnutrition.	3
Tuberculosis,	2
Mentally retarded,	3

Contagious diseases,	4
Diseases of skin,	3
Orthopedic,	3
Vaccination,	6
Other causes,	12
Number interviews with officials and others,	37
Number of children to physicians,	3

In the dental clinic the following work has been done:

Number cleanings,	64
Number fillings, cement, amalgam,	122
Extractions,	40

REPORT OF THE DIRECTOR OF MUSIC.

Mr. L. J. Rundlett, Superintendent.

DEAR SIR: The abnormal conditions existing during the past year and especially during the last semester have made it difficult to maintain the usual standard of work. That we have been able to so nearly realize it is due to the earnest work of the teachers for which I wish to express my deep appreciation.

A new rote-song book used in Classes A and B has aroused renewed interest in rote singing and given a better understanding of the correct use of the child voice.

The individual sight singing in Classes E to L inclusive has taken on a higher standard of attainment.

Chorus singing in the higher grades has been of an average degree of merit. A cantata of High School grade has been successfully given by the Junior High School.

The pupils in the Domestic Science and Arts Classes have taken up the work in music in a very satisfactory way.

The High School Orchestra is more effective than it was last year and material in sight leads me to hope for continued improvement.

The demand for the services of the boys "after school" has prevented the formation of a Boys' Glee Club. The Girls' Club has done excellent work.

The work of the Senior Class from the Dewey Training School has been badly interfered with by non-attendance.

Again I thank the Superintendent and Board of Education for encouragement and support.

Respectfully yours,

CHARLES S. CONANT.

REPORT OF THE DIRECTOR OF MANUAL TRAINING.

Mr L. J. Rundlett, Superintendent of Schools.

DEAR SIR: In answer to your request, I submit herewith my first annual report of the work of the Morrill School of Mechanic Arts.

The past year has been one of changes and readjustments in our school work as well as throughout the nation. As the months went by and the thought of the entire country became centered on "Winning the War," it became more and more a question of how we could best coöperate directly or indirectly to this end. When Mr. French left this school in March to enter the service of the United States Shipping Board, three war classes for training drafted men were well under way. The Radio class had been in session for nearly five months, the Machine Shop class about two, and the Forging-Acetylene Welding class a little less than that. The Radio class was continued until after the armistice was signed in November, though with several breaks in its sessions during the summer vacation and the influenza period. The first group of Machine Shop men finished their work early in June, and because of an insufficient number of new enrollments the class was discontinued. Later in June the class in Forging-Acetylene Welding also finished its work. At this time it was decided that the school should purchase an acetylene welding outfit of its own, and that the next group of men should specialize in this branch of the work. This was done, and a second class, larger than the first, was organized early in July and continued into November, except for five or six weeks during the epidemic.

These classes all worked under the handicap of having men enlisting and being drafted from their ranks before

completing the allotted unit of work. The fact that the sessions were held in the afternoon when many men could not leave their work also tended to prevent the largest number making use of the opportunities offered. Yet in spite of these things many of the men went into the branch of the service for which they had been trained, and succeeded. It has been a source of great satisfaction to the instructors of these classes to talk with the men as they have been home from time to time, and hear their expression of the help which their training at the school has been to them.

The evening drawing class which has been so successful the past two or three seasons has recently been organized for its winter term. The enrollment is at present 19, all of them being men from the industries of the city, who realize the value which a training in mechanical drawing, reading of blueprints, etc., will be to them in their work.

During the spring vacation last April it was decided to reorganize the program of the Morrill School to conform with the new Federal program as laid out under the Smith-Hughes Act. As far as our school was concerned it meant this: The Smith-Hughes program recognizes three classes of subjects for a mechanic arts course. (1) Shop or Vocational, (2) Related, (3) Non-related. The first two are to be taught in the shop by the shop instructors, and the third in the High School proper. In our school session of six periods per day, at least half of the time is to be spent in the shop or studying the related subjects. So that where our old program called for twelve periods per week of shopwork and drawing, under this new program the boys receive instruction in this school at least fifteen, and in most cases twenty periods per week. This necessitated adding to our course of study one new vocational subject, Electricity, which I will speak of later in the report, and two related subjects, Applied Physics, and Mechanics. The result of this additional time in the shop has had the following affect on the enrollment. One year ago there were 156 High and Parker School pupils, including 28 specials, taking work in this building, for a total of 1,407

pupil-periods per week. At the beginning of this present semester there are 114 High and Parker School pupils, which includes a few specials, taking a total of 1,770 pupil-periods per week.

Largely as a result of this new program it became necessary to move the woodworking equipment from Room 3 to a new room in the basement of the Rumford School. This gives a room in the south end of the city for the Elementary Manual Training, and with the room in the Walker School, allows all the grammar school woodwork to be taken care of outside of our building. As the combination of high and grammar school classes in one building had never been ideal, this arrangement is from this point of view an improvement. Perhaps the most serious drawback to this arrangement has been the fact that six different teachers have had classes at different periods through the week in the room in the Rumford School, with the consequent difficulty of keeping tools or supplies in order. This number will be reduced to three this coming semester and the results should improve accordingly.

In connection with the Elementary Woodwork a new course laid out by Mr. Hartwell is being tried out this year, which will it is hoped combine the advantages of the old blueprint system and the more recent project system, with none of the unsatisfactory aspects of the latter.

A number of changes have taken place in the teaching force during the present year. Soon after Mr. French left to go into the service, Mr. Willard H. Nute, C. H. S. 1918 (Jan.) was engaged to come in as an assistant in the machine shop and patternmaking departments. Mr. Wiesmann and Mr. Gove resigned in June to take positions elsewhere, and Mr. Alden resigned to go into the service. Their places were filled by Mr. Herbert C. Wilcox (patternmaking), Mr. Waldo S. Roundy (printing), and Mr. Harry R. Sturm (woodworking), all being residents of this city. The addition of the work in electricity called for an another instructor, though it was not until about the first

of November that we secured Mr. Philip H. Pike to teach that branch of the work.

For the coming year I would recommend the following additions to our equipment: The Electrical Course calls for theory and constructive work in a variety of electrical subjects, and practically all the equipment for this is yet to be purchased. To do the work we have laid out I should estimate that equipment to the value of about \$350 will be required at once for this department. A very valuable accessory to this electrical work as it deals with the electrical equipment of automobiles and their repair would be a small building to be used as a garage, or in the coldest weather for lumber storage. This building could be constructed by the boys, and plans and specifications for it have been completed for some time. The estimated cost of such a building is about \$200. Finally, it is probable that with continued large classes from the Parker School it will be necessary to add a new equipment of woodworking tools before next September to replace those which were taken to the Rumford School. In that case, Room 3 would be used for both electrical and woodworking classes, and the plans have been made with this in view. For the Applied Physics work, the addition of an electric pyrometer is necessary in order to illustrate modern methods of heat treatment of iron and steel.

These additions to and improvements in our equipment are only such as will enable us to carry out the spirit as well as the letter of the Smith-Hughes program, as it is outlined by the State Department of Public Instruction, and approved by the Federal Board for Vocational Education.

Respectfully submitted,

RAYMOND P. GILMAN.

REPORT OF INSTRUCTOR IN MILITARY DRILL.

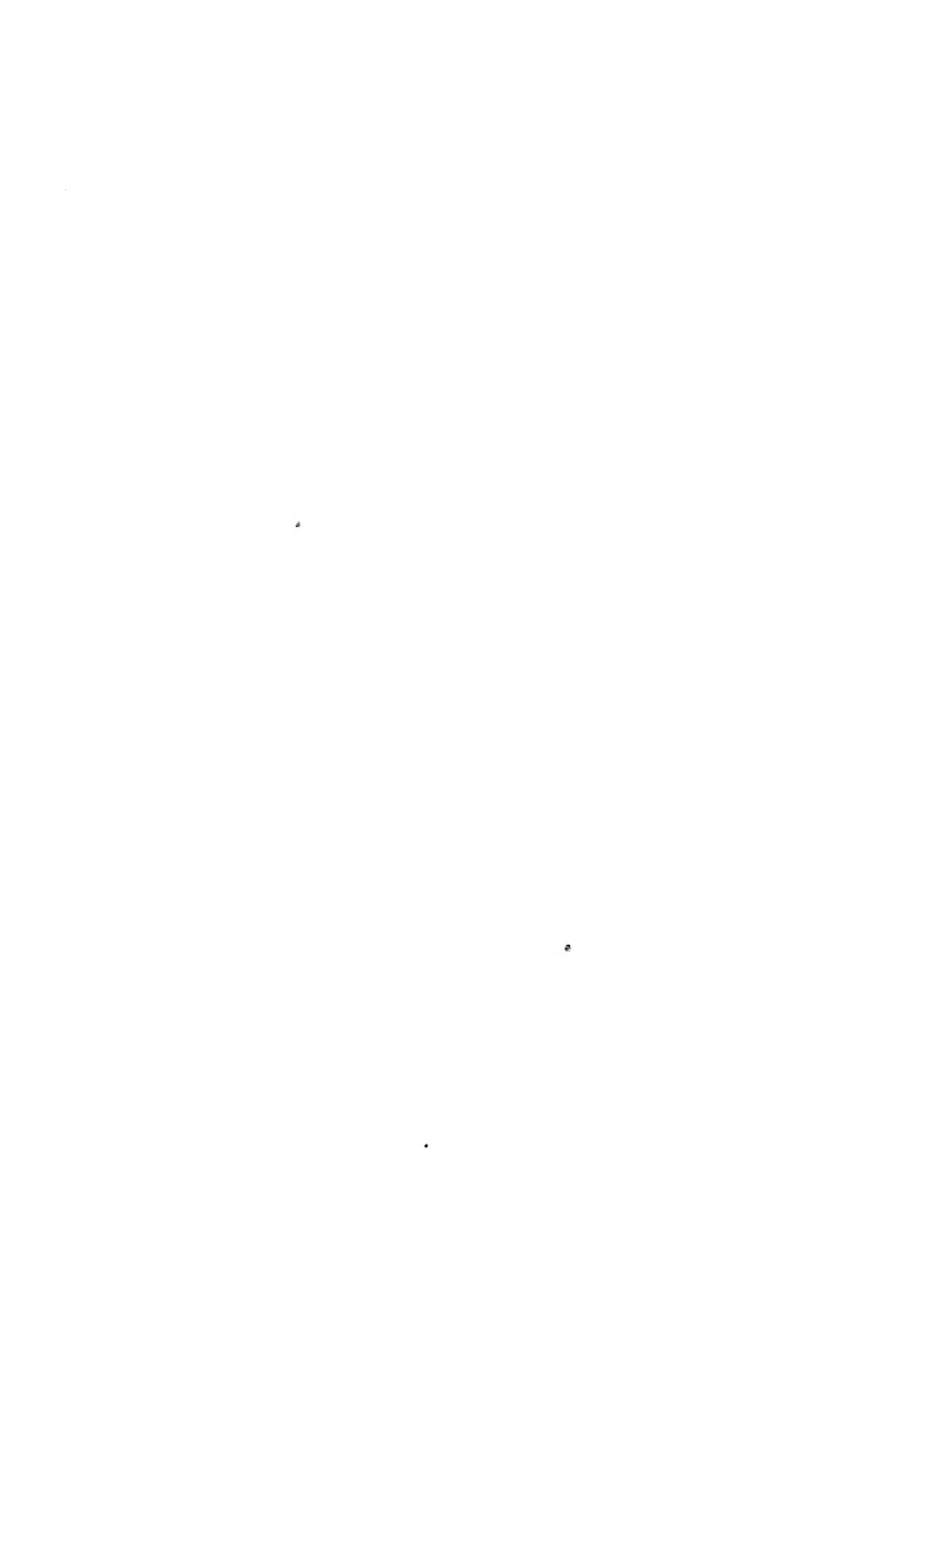

Mr. Louis J. Rundlett, Superintendent of Schools.

DEAR SIR: Military drill at the High School went along in a very satisfactory manner until the signing of the armistice, November 11th, when a company of fifty dwindled down to about thirty and remained at that number until two weeks ago, when the old spirit seemed to be revived and most of the boys came back again.

I hope we will be able to go on the range this summer and have target practice.

In order to get the results desired and bring the cadets back to their old time form I would suggest that military drill be made compulsory.

MICHAEL H. MULLIGAN,
Instructor, Military Drill.

REPORT OF ANNUAL MEETING.

In accordance with the foregoing warrant, a meeting of the legal voters of Union School District was held at the Auditorium on Prince Street in Concord, on the evening of April 4, 1918, at 7.30.

The meeting was called to order by Louis C. Merrill, moderator.

ARTICLE 1. On motion of Arthur F. Sturtevant the clerk was authorized to cast one ballot for Louis C. Merrill as moderator for the ensuing year and he was declared elected. He was sworn to the discharge of his duties by the clerk.

ARTICLE 2. On motion of Henry H. Metcalf the moderator was authorized to cast one ballot for Herbert W. Rainie as clerk for the ensuing year and he was declared elected. The oath was administered by the moderator.

ARTICLE 3. On motion of H. E. Chamberlain, John P. George and Henry H. Metcalf were chosen auditors for the ensuing year.

ARTICLE 4. On motion of A. F. Sturtevant, the report of the Board of Education as printed, was adopted and placed on file.

ARTICLE 5. On motion of A. F. Sturtevant the meeting proceeded to the election of three members of the Board of Education for three years. It was unanimously voted that the polls be closed at 7.50 P. M.

It was voted that the meeting proceed with its consideration of the articles of the warrant until the close of the polls.

ARTICLE 6. On motion of H. H. Metcalf, it was voted that there be raised and is hereby ordered to be raised on the polls and ratable estates within Union School District, the sum of fourteen thousand nine hundred ninety-five dollars (\$14,995) of which sum six thousand nine hundred ninety-five dollars (\$6,995) shall be appropriated for the payment of the interest on its bonded debt accruing during the year and eight thousand dollars (\$8,000) for the payment of the bonds of the district maturing July 1, 1918.

ARTICLE 7. On motion of A. F. Sturtevant, it was voted that there be raised and is hereby ordered to be raised on the polls and ratable estates within Union School District for the support of schools for the ensuing year such a sum as in addition to the sum assigned to the district by the City of Concord out of its appropriation for schools, will amount to the sum of one hundred fifty-two thousand, seven hundred ninety dollars and fifty cents (\$152,790.50) and that the raising of the additional amount needed for the period from the expiration of the ensuing year to September 1, 1919 be deferred until the next annual meeting.

ARTICLE 8. On motion of Henry E. Chamberlain, it was voted that there be raised and is hereby ordered to be raised on the polls and ratable estates within Union School District for special repairs to school buildings the sum of two thousand dollars (\$2,000).

The polls closed at 7.50 and the vote was as follows:

Whole number of votes cast 18. E. C. Niles, Osma C. Morrill, and Charles Duncan had each 18 and were declared elected members of the Board of Education of Union School District to serve three years.

There being no further business, it was voted to adjourn.

A true record. Attest:

HERBERT W. RAINIE,
Clerk.

CONCORD, N. H., February 1, 1919.

To His Honor, the Mayor, and Board of Aldermen:

The Board of Water Commissioners herewith transmits the annual report of the superintendent for the year 1918. His report as usual is so full and complete that no extended report of the Board is necessary.

The water system of the city is in a thorough and satisfactory condition. The watershed of Penacook Lake adjoining the water, with the exception of a small water front, is now owned by the city, and the public use of the surface of the lake is practically ended, so that there is slight danger of contamination of the water.

The financial condition of the city water works from its beginning to January 1, 1919, in brief is as follows:

Construction account,	\$1,092,003.83
Total bonds issued,	710,000.00
Bonds paid,	303,000.00
Bonds outstanding,	407,000.00
Interest account in 1895,	27,425.00
Interest account in 1918,	16,325.00

Of the total construction account of \$1,092,003.83 only \$407,000 remains unpaid.

Net Income is invested as follows:

The Board of Water Commissioners desires to record at this time its deep sorrow occasioned by the death of one of its oldest associates in service, Edson J. Hill.

Mr. Hill served as clerk of the Board for many years, and at the resignation of Col. Solon A. Carter, was the unanimous choice of the Board as president.

Mr. Hill possessed rare business judgment and ability; and he gave his best in service in filling the many positions of trust that he held. His death is keenly felt by his associates, as indeed the whole community mourns the loss of a valued and respected citizen.

Mr. Hill was first elected a member of the Board in 1895 and served continuously until his death on May 18, 1918. He served as clerk of the Board from April 5, 1902, to April 7, 1917, and as president of the Board from April 7, 1917, to May 18, 1918.

The following resolution was passed July 10, 1918, by the Board:

Resolved, That this Board will officially place upon its records this testimony to a faithful public servant and a warm and devoted friend; and that the Board respectfully tenders its heartfelt sympathy to Mrs. Hill and other members of the family in this season of their bereavement and affliction.

Respectfully submitted,

EXTENSIONS AND IMPROVEMENTS.

Cast-iron distribution pipe has been laid during the year as follows:

In Clarke Street,

Extended north, 96 feet 6-inch pipe, in place of 1 $\frac{1}{4}$ -inch pipe discontinued.

Total amount laid during the year, 96 feet.

Total length of main and distribution pipes now in use, 374,550 feet, equal to 70.94 miles.

Total number of gates now in use, 1,048.

There have been laid during the year and connected with the main pipes, 5 service pipes consisting of 126 feet of $\frac{3}{4}$ -inch pipe and 48 feet of 2-inch pipe. There have been discontinued, 2; total number of service pipes at the present time, 3,882; total length of service pipes, 91,844 feet or 17.39 miles.

There have been relaid 12 services and 14 curbs have been placed on old services.

We have set 21 meters during the year; removed, 3; total number now in use, 2,576.

The following table shows the height of water in Penacook Lake on the first day of each month:

January,	181.50	July,	182.55
February,	181.30	August,	181.90
March,	181.00	September,	181.35
April,	182.00	October,	181.60
May,	183.25	November,	181.20
June,	183.05	December,	181.15

The lowest point reached during the year was 181, on March 1 and on November 16; the highest was 183.35, on May 5; mean height for the year was 181.84, which was 1.97 feet lower than the mean height for 1917.

Water has been supplied to four community war gardens for spraying purposes only, free of charge, by vote of the Board of Water Commissioners and were located as follows:

Hall Street, at ball grounds,
 Ridge Road, near Rev. Lorin Webster residence,
 South Street, opposite I. W. Bushey residence,
 West Concord, at Eastman field.

After twenty-six years of operating the pumping station by steam, it has been decided to install an electrically operated centrifugal pump. The present pumps, one of which was installed in 1893 and the other in 1904, are to be kept in good condition in readiness for any emergency.

A contract has been made with the Worthington Pump and Machinery Corporation for one Worthington 8 inch type 'BS' slow speed horizontally split casing volute centrifugal pump, to be operated by a 100-horse power A. C. motor. A satisfactory contract has been made with the Concord Electric Company for all power and it is hoped

that the unit will prove a success. A Venturi meter will be installed which will measure all water pumped and also check the performance of the pump and show the efficiency of the present pumps.

I wish to express my thanks to the members of the Board for their interest and support in the conduct of the affairs of the department and my appreciation of the faithful services of the employees.

Respectfully submitted,

PERCY R. SANDERS,
Superintendent.

REPORT OF THE ENGINEER AT PUMPING STATION.

PUMPING STATION, CONCORD WATER WORKS.

P. R. Sanders, Superintendent:

FIRE DEPARTMENT.

REPORT OF CHIEF ENGINEER.

To the Board of Aldermen:

In accordance with the requirements of the city ordinance, I herewith submit for your consideration the report of the Fire Department for the year 1918.

The department responded to 43 bell alarms and 198 still alarms.

In addition, two fires occurred, entailing loss, for which no alarms were given, making a total of 243 for the year.

	Bell.	Still.	No alarm .	Total.
Precinct,	20	150		170
Penacook,	13	39	2	54
East Concord,	9	4		13
West Concord,	1	5		6
	—	—	—	—
	43	198	2	243

This report will be found to contain statements in detail embracing the amount of expenditures, a complete roll of the department with residence and occupation of each member, a record of all fires and alarms which have occurred during the year and the causes thereof as nearly as could be ascertained, with the names of the owners or occupants and the value, loss, insurance, and insurance recovered in each case.

Of the aggregate loss entailed by fire during the year more than eighty per cent resulted from four fires, two occurring in the precinct and one each at Penacook and East Concord.

The apparatus is in good condition.

One motor-driven combination chemical and hose car was added to the equipment and another contracted for but not yet delivered.

Combination 1 was provided with a new set of tires at an expense of \$363.00.

The fire alarm systems of the precinct and Penacook are in good condition.

One six-inch mechanical tapper was added to the Penacook system.

The plates in the precinct storage battery are now well along on the fourth year of service.

As in theory the tenure of usefulness is but three years necessity for renewal cannot be far off.

As no hose was purchased during the year I respectfully recommend the purchase of five hundred to one thousand feet depending largely upon return of price to normal condition.

Provision should also be made for relining approximately one thousand feet.

The duties incumbent upon the undersigned in the line of inspection of wires and buildings have been performed.

The constantly diminishing forage, horse shoeing and veterinary bills bear ample evidence of the wisdom of the policy of motorizing the apparatus.

During the month of June I had the pleasure of attending the convention of the International Association of Fire Engineers held at Chicago, Ill., a report of which I rendered at that time.

I wish again to take occasion to thank your honorable body for the opportunity afforded me to attend.

Respectfully submitted,

W. C. GREEN,
Chief Engineer.

PUBLIC LIBRARY.

REPORT OF THE TRUSTEES.

To the Board of Mayor and Aldermen of the City of Concord:

The trustees of the Public Library herewith file the annual report of the librarian, which covers in a comprehensive way the results accomplished during the past year. As suggested therein the need of more adequate accommodations is constantly becoming more and more apparent. A new and larger library building is demanded.

The trustees recommend that the amount of the appropriation for library purposes for the current year be the same as was appropriated last year.

Respectfully submitted,

REUBEN E. WALKER,
President, Board of Trustees.

REPORT OF THE CITY LIBRARIAN FOR 1918.

To the Board of Trustees of the Concord Public Library:

GENTLEMEN: Perhaps it is admissible to make a report an account not only of work done, but of unusual circumstances under which it has been done? Then I should like to call attention to the fact that during this year we have had the interesting experience of being pulled out of our rut and told by Government to do certain things. In several ways we have been used as part of the educational apparatus of the country. Though not rescinding our refusal to display printed matter advertising private causes, we have, for the benefit of national drives, of Red Cross needs, of patriotic lectures, etc., etc., papered our walls with posters and proclamations. The Food Administration in particular has requested our collaboration, requiring us to get over to the public facts relating to over-fed and under-fed nations.

As library publicity director appointed by Mr. Huntley Spaulding, it has been my job to try to see that Mr. Hoover's recommendations were brought to the notice of every borrower at every library in the state. I could not have performed this task at all if the local Food Administration's office in the State House had not kindly done for me the mimeographing of circular letters and the mailing of the same to the two hundred and twenty public libraries in New Hampshire.

I have heard of one town's library which, given by a rich man, is wholly under his control, and he has not allowed it to display Government propaganda because that would disfigure the artistic interior. We have willingly had our wall-space resemble a billboard, seeing that by so looking it drew notice to what an anxious Government was endeavoring to get into the consciousness of an easy-going people. Not a month passed in 1918 without the privilege of being called to some little public service, like talking

to other librarians to reconcile them to the flood from the government presses or telling children in primary schools that to be wasteful was to be naughty.

All this has made the past year as important as any I have ever recorded, but, however, rather in the kind of work done than in the volume of it.

For our desk circulation dropped to 82,739 volumes, and our reference inquirers numbered only 4,045. Not merely were persons preoccupied with the war, but there are two other reasons why our patronage decreased. In the winter there was apprehension of a shortage of coal, and to avoid all-day closing, later on, the President of this Board in agreement with several members of it authorized the library not to keep open during the forenoon, from January 16 to March 26. Again, in the autumn the serious prevalence of influenza led Mayor French to close all places frequented by crowds, and the library shut its doors for the first time since it was established in 1855. It remained closed from October 8 to October 28.

It was an item of our 1917 Report that in the nation-wide appeal for a million dollars to help the American Library Association's war work, Concord responded finely, giving over a thousand, and we are gratefully preserving a record of the donors and their contributions.

In 1918 the national library association asked for books rather than money, and the drive in April secured over half a million volumes for the use of soldiers and sailors. In Concord fully two thousand books were brought in by two hundred persons whose names we have on file, and we have sent twenty boxfuls of capital reading matter to cantonments and ports of embarkation. More magazines were offered than we could forward; from these the staff, at odd moments, have culled dozens of good short stories which they have made into very attractive booklets that can be enjoyed by men too sick to handle anything heavier.

This library was the medium through which Miss C. Azella Hood, a Concord High School teacher loaned to Plattsburg Barracks, was granted her desire for a victrola

and records to help in her reconstruction work. Immediately upon the library's stating it would receive gifts for the purpose, the instrument itself was given by a Concord lady who asked that it be considered a reminder of Lieutenant Raymond Thompson, for whom flies a flag with the golden star.

This is not the place to describe the growth of the American Library Association; suffice it to say that by last November it had proved itself such an agency for good that it was harnessed with six other national organizations and made the successful seven-fold campaign for \$170,500,000, of which \$3,500,000 is being expended admirably by the A. L. A.

The necessity for our library to do its bit along the lines of war work may be over now, but I think that no institution which has once felt the uplift of such service should ever relapse into a petty or provincial point of view.

Fortunately there is no need for the Concord Public Library to be unqualified for a high order of usefulness. Again a citizen has died leaving us money to be spent otherwise than for fiction. Last February Judge William M. Chase passed away and in his will was this generous item graciously expressed: "To said City of Concord, the further sum of One Thousand Dollars, to be held in trust forever, the annual income thereof to be used for the benefit of its Public Library, in the purchase of books on historical, political, sociological, scientific and educational subjects. I make this bequest as a slight token of my gratitude for the kindness and encouragement I have uniformly received from the citizens of Concord, while I have been a resident among them."

You will recall that Mr. P. B. Cogswell specified that the interest on his bequest should be spent for "biographical, geographical, historical and scientific books." Mrs. Ela, in establishing the Hazeltine fund, requested that it go toward buying "high-class literature." Mr. S. C. Eastman, who at his death in 1917 was found to have had this library down in several ways as a beneficiary, stated that the

income from twenty-five shares of stock be used for the purchase of books in foreign languages.

Now I would that each of these benefactors could, by legal means, have given us not only worth-while books, but readers for them!

I think we face a problem. If we buy in strict accordance with the terms of these four wills, there will accrue a library which could be boasted of as fine but which would be scarcely read. Possibly the Wonalancet Club knows somewhat of this experience. I fear it is beyond the power of advertising or of persuasion to get the non-fiction of a public library read to a due degree. Many persons, pressed for time, are satisfied with the information afforded by moving pictures and monthly and weekly periodicals. You must recognize that Concord, through not being a manufacturing city, furnishes almost no clientele eager for the latest scientific works. I am not saying that in sociology and pedagogy there is not much solid reading done here. The leaders along these and similar lines in Concord are not behind anybody in being posted in their work; but the books they read are often those which they must own themselves to refer to constantly. I wish every professional man would treat us as does Rev. George H. Reed. He will telephone, "Have you such and such a book?" "No; ought we to get it?" "Well, my friend on the faculty at Columbia says it is the best new work on that topic." "All right, we'll buy it." And we do and through Dr. Reed's use of it, the gist of the book is got over to many minds.

Of course to acquire historical and political matter is the province of the Historical Society and the State Library; and is it too much to say that it would be a wicked waste of public money and of shelf-room for the three libraries so near together to duplicate one another's material? As to books in other languages than English, we already add enough to keep up with the demand made by our small foreign population.

Aided by my Book Committee and by recommendations experts would kindly make, I can buy books to satisfy the

requirements of the bequests; but will they be adequately read before they in turn cease to be authoritative works?

Any highly specialized book we can and do borrow from the Boston Public Library; and possibly, if the Concord Public Library is to acquire annually a larger proportion than heretofore of rather weighty non-fiction we can, by the growing system of inter-library loans, make these books serve more than the residents of Concord. It was probably no such use that the testators had in mind, however.

It has seemed to me that the province of this homey, cheery, unpretentious Public Library was especially to take care of the book work with schools and clubs; to help ambitious youth and to entertain their tired elders. If, though, our library is scheduled to attract a greater number of mature readers to the examination of a superior quality of books, will not that require a new building suitable in appearance and accommodations?

Since the last calling together of this Board Mr. Edson J. Hill has been taken from your company. In his death which occurred on May 18, many like myself lost a life-long friend; but here it is of him as a trustee that I wish to speak. He was almost invariably present at your councils, and by that steadfast attendance and in other ways he proved his interest in all matters relating to the library. Indeed, he manifested exceptionally faithful concern for everything with which he was officially connected. He had had long experience in affairs affecting the city and great confidence was felt in his good judgment. This first annual meeting since his death brings a keen realization of the loss this institution has sustained.

1918 has seen repeated the devoted work of my assistants; their loyal spirit finds illustration in the fact that though they were legally entitled to Election Day and Victory Day, they heartily agreed that, seeing the library had been closed in the earlier fall, it better be kept open on these two holidays so as to give a good measure of service to the pleasant Concord public.

Respectfully submitted,

GRACE BLANCHARD,

City Librarian.

REPORT OF THE CITY ENGINEER.

CITY ENGINEER'S OFFICE, CITY HALL,
CONCORD, N. H., December 31, 1918.

To the Board of Mayor and Aldermen:

The twenty-sixth annual report to your board is herewith submitted.

The expenses of this department for the year were as follows:

Paid engineer and assistants,	\$3,362.00
for supplies,	44.04
telephone rental and tolls,	22.25
express,	.35
transportation,	40.50
real estate transfers,	9.90
incidentals,	65.28
repairs,	4.58
	<hr/>
	\$3,548.90
Appropriation,	\$4,550.00
Expended,	3,548.90
	<hr/>
Unexpended balance,	\$1,001.10

SEWERS.

The work done under this appropriation is detailed in the report of this department to the Board of Public Works.

WATER WORKS.

A complete set of plans showing the pipe lines and appurtenances of the system were completed, tracings made and a volume of blueprints of same consisting of 225 sheets, bound in book form, turned over to the superintendent of the works.

FIRE DEPARTMENT.

The plans showing the location of hydrants and fire-alarm boxes were brought up to date and blueprints of the city and Penacook districts furnished the chief of the department.

BUILDING PETITIONS.

Twenty-seven petitions for new buildings or for alterations in existing structures were presented to the chief of the fire department and your city engineer. Together we have attended the hearings upon them and granted the petitions with such restrictions as seemed proper for the case under consideration.

All petitions have been filed with the city clerk with our action endorsed upon them.

CEMETERIES.

One new block has been laid out in lots in Blossom Hill Cemetery. A plan showing dimensions of lots and their areas was made and turned over to the superintendent.

One new block has been laid out and graded on the front of this cemetery and will be ready for dividing into lots in 1919.

Further studies on the "Bradley" addition to this cemetery have been made and data secured for future use in its development.

Much additional land can be easily made available in the old portion by building a culvert in the ravine just west of Rumford Street, and filling it to a suitable height for burial purposes. Much of this fill can be made with ashes, or any non-decayable materials which may become available in near-by sections of the city.

That portion of Blossom Hill Cemetery lying just west of block "M" is too wet for burial purposes. This condition can be overcome by removing the pond now at the southerly end of the cemetery and carrying the under-drains to the culvert below the pond.

The sale book of Blossom Hill Cemetery has been brought up to date from the deed stubs.

ASSESSORS' MAPS.

Little field work was required the past season for the maps.

The property transfers were kept up to date from the monthly reports furnished this office by the register of deeds, showing sales as indicated by the deeds recorded.

A map of the entire city, showing the various sewer, lighting, and garbage precincts and the two school districts, was made and delivered to the board of assessors.

The lists of real estate owners in the city, as shown by deeds, were made for the assessors as soon after April 1st as we were able to get the March transfers.

MISCELLANEOUS.

Considerable time was spent in laying out and plotting the "War Gardens" for the committee in charge. Fourteen parcels of land were divided into 495 lots of various dimensions, and plans furnished the committee to aid them in allotting the same.

The bridge over the canal in Main Street, Ward 1, which was built by the New Hampshire Spinning Mills, and turned over to the city for future maintenance, removes from this street a menace to heavy trucking. The new structure was built on specifications and plans submitted by the Spinning Mills.

Someone from this office saw the reinforcement placed, the concrete poured and that the general requirements of the specifications were adhered to. The finished bridge should be free from expense to the city excepting the resurfacing of the roadway and the occasional replacement of the guardrail on its upstream side.

We have made for the use of the Board of Public Works a mounted paper map of the entire city, showing the streets and highways. This map is hung in the office of the mayor.

Owing to the small demand of other departments for services during the past season we have been able to do much needed plan work to keep up to date. Our force has been unusually small but the work accomplished has been of importance to our plans and records.

The demands for information from private individuals is constantly increasing, regarding the ownership of lands in the city, and we have been able to aid many of them from our assessors' maps and other data in this office.

For the privilege of attending the annual meeting of the American Society of Municipal Improvements, held in Buffalo, N. Y., early in October, I am grateful, as it was a source of much profit to all who were present at its sessions, where municipal service in its many phases was openly discussed.

The employees of this department during the year were as follows: Fred W. Lang, principal assistant, and Herbert Walker, rodman, who have rendered good service to the city.

For the interest taken in this department, and the many courtesies extended to it by your board, I wish to express my appreciation.

Respectfully submitted,

WILL B. HOWE,
City Engineer.

REPORT OF BOARD OF EXAMINERS OF PLUMBERS.

CONCORD, N. H., December 31, 1918.

To the Board of Mayor and Aldermen:

The nineteenth annual report of this board is herewith submitted.

The membership of the board is as follows: Arthur W. Robinson, journeyman plumber, Charles H. Cook, M. D., and Will B. Howe, city engineer.

The board organized with Arthur W. Robinson, chairman, and Will B. Howe, clerk.

Two applicants for journeyman's licenses were received and the parties examined. Both passed their examinations and were granted licenses.

Two meetings were held during the year for the purpose of organization and the examination of the two applicants mentioned above.

Licenses and certificates were issued to the men named in the attached list. This list shows the date of issue and the amounts paid by each man.

The total receipts of the board were \$27.50. The expenditure for postage was \$1.43.

REPORT OF THE BOARD OF HYDRANT COMMISSIONERS.

CONCORD, N. H., December 31, 1918.

To the Board of Mayor and Aldermen:

The thirteenth annual report of this board, for the year 1918, is herewith submitted.

No meetings of this board were held during the year, and no recommendations were made to the water board.

Respectfully submitted,

WILL B. HOWE,

Board of Hydrant Commissioners.

REPORT OF THE BOARD OF PUBLIC WORKS.

REPORT OF THE HIGHWAY DEPARTMENT.

To the Board of Public Works:

GENTLEMEN: The amount of work done by the Highway Department during the year 1918 was less than usual as no permanent improvements were made and on account of the shortage in labor it was possible to accomplish only a small amount of repair work.

In the early spring when we had a number of able-bodied men the work of plowing gardens was placed under this department. While I was thoroughly in sympathy with the movement to increase the number of gardens to help win the war, I realized from the experience of the previous year that it entailed a large amount of work at a time when the highways needed repairing and it did not seem right to neglect them. We had passed through an unusually severe winter that had left the highways both in the city and on the outskirts in very bad condition and much in need of repair. Certain kinds of road work can be done more easily in the spring but in spite of the good weather conditions for doing some of this work we were obliged to spend about six weeks of that time in plowing gardens which required a number of teams and a large number of our able-bodied laborers. Last year the plowing was done free but this year the board decided to charge those able to pay for the work. A very small per cent of those agreeing to pay have done so and the amount collected is small. The following shows the cost of the work for 1917-1918:

1917. Cost of free plowing,	\$2,457.63
1918. Cost of plowing,	2,866.82
1918. Bills sent out by department,	\$1,292.06
Bills sent to garden committee,	1,603.03
	<hr/>
	2,895.09

Amount collected from department bills,	\$582.38	
Amount received from garden committee bills,	132.50	
	—————	\$714.88

Next spring will probably find our highways in much worse condition than for a number of years due to the fact that so little repairing was done on them last year and that the truck traffic increased to a considerable extent. The main thoroughfares receive most of the pleasure riding but there is hardly a street in the city that is not used by auto trucks for commercial purposes. Traffic of this kind has increased rapidly in the last few years and probably the limit of development in the commercial line has not been reached. Such traffic demands good roads and we should have them but at the present time and until we are a little more certain just how great this development is to be it would seem wiser to spend more in maintaining the roads that we have already improved than to expend large sums in new construction. Roads that were improved a few years ago, owing to the great increase in truck traffic are getting in bad condition. There are a number of streets in our city, some of which have never been permanently improved that are completely worn out. While they cannot all be macadamized many of them should be regraded and put in better shape. Instead of appropriating money for permanent work I earnestly hope more may be appropriated for general maintenance and a portion of it expended on such streets as South Main, Pleasant, Warren, Washington and others that are very much in need of repair.

To do this work a new crusher is needed. The old plant has been in use about twenty years and has become expensive to keep in repair and we do not get good results when operating it. There should be a new crusher, storage bins, etc., and electric power installed to run the plant. There is much wasted time in starting up the present plant when only a few loads of stone are needed.

With the large amount of work ahead for the coming summer it is imperative that something be done in regard to a new crusher. Another matter that I have brought to your attention in several past reports is the condition of the sheds on the city lot. There is neither suitable nor sufficient shed room to properly house the tools and machinery of the department. Since the two new trucks have been added to our equipment it will be necessary to enlarge the garage but this can be done easily as it was built with the idea of enlarging it as needed.

Very few petitions for new concrete walks were presented last summer and therefore little work was done in that line. Many of the old concrete walks were repaired and there is great demand for that work each season. Tree roots have thrown the walks out of shape in many places and made repairs necessary.

The trees set out by the department in the last two seasons have done remarkably well. A large per cent of them show a healthy growth but considerable damage has been done to them in some places by boys. Quite a number of dead trees have been removed and I think it would be well to continue the planting of trees each year. The brown-tail moth was not numerous last season but the gypsy moth was found in large numbers in all parts of the city and a few trees were affected by the elm tree beetle.

We were not able to purchase oil for second application as a dust layer owing to government restrictions. The advantages of using oil as a dust layer are many and I would recommend its use another year.

The garbage truck has been in use since July, 1914, and excepting a few repairs has been no expense to the department and proved its efficiency in collecting garbage. It now needs considerable repairing and the machine is being thoroughly overhauled during the winter months.

Respectfully submitted,

ALFRED CLARK,
Superintendent.

REPORT OF THE CITY ENGINEER.

To the Board of Public Works:

The eighth annual report to your board showing the work done under the supervision of the Engineering Department, for your board, is herewith submitted:

SEWERS.

For the first time since this department was created no sewers were extended and no new sewers were laid during the past season.

The cause is well known to your board and the public, viz., the shortage of labor and our inability to secure laborers in competition with government prices.

Practically the whole season was spent, with a very small gang, in repairing the old sewers, building much needed manholes on various streets and the cleaning of 10,070 feet of sewers. In many sewers we found a large growth of roots from adjacent shade trees, which emphasizes the necessity of changing the material used for joining the pipes in future construction.

The unusual amount of sand and gravel removed from the sewers was the result of overflowing catch-basins, which should be more thoroughly and regularly cleaned. The sand and gravel can be much more easily and cheaply removed from the basins than the sewers.

But one permit for new sewer connections has been issued during the past season, although the report of the sanitary officer shows five new connections made.

In our cleaning operations we found house connections run into an eight-inch pipe from two inches to six inches. This should be remedied by a more careful inspection of all connections as they cause unnecessary expense and trouble in the mains and poor service to the premises so connected.

The sewer cleaning machine purchased last spring is a valuable addition to our outfit. Without it we should have been obliged to dig up and relay two miles of sewers, at a

cost of many thousands of dollars in excess of the amount expended with the machine.

The need of relaying Beacon street was well illustrated last winter, when we found about 60 feet of 12-inch pipe solid full of sticks and sand from the catch-basins. It is a line which needs relief at the earliest possible moment. It is hoped that the coming season will be such that labor can be secured and this much needed improvement made. The material for the pipe is on the ground and should be laid before further damage is done to it. The full benefit of this change will not be reached until the sewer in Rumford street and a portion of Franklin street are relaid with larger pipes.

There has been expended for flushing, repairs, cleaning, and new manholes the following amounts:

No expenditures were made for this precinct in 1918, leaving a balance on hand of \$94.55.

The usual monthly statements of coal-tar concrete laid in the streets and on the sidewalks have been made, and the statements turned over to the department or committee ordering the work done. These statements show the yards laid, the price charged, and the location of the particular piece of work.

Grade stakes were set for one piece of street work on South Main street, for the street department.

In company with one or both of the other members of the committee for locating poles, I have attended to that duty when notified, any hearings or meetings of your board when requested, and furnished such information from this department as called for.

For the courtesies extended this department by your board, I wish to express my appreciation.

Respectfully submitted,

WILL B. HOWE,
City Engineer.

HEALTH DEPARTMENT.

REPORT OF THE BOARD OF HEALTH.

To the Board of Mayor and Aldermen:

Following is the report of the Board of Health for the year ending December 31, 1918:

The board held its first meeting February 4, 1918 with Mayor French in the chair. Regular monthly meetings were held thereafter and numerous special meetings were found to be necessary especially during the prevalence of influenza in the fall. At this time the members of the board were in almost daily conference and rules and regulations were adopted with respect to public gatherings of all kinds in the hope of stopping the spread of the scourge. Generally speaking these rules and regulations were favorably received and the board had the coöperation of all those concerned in their effort to minimize the spread of the malady. In spite of all precautions a very considerable proportion of all the population had the influenza.

It is impossible to say with anything like exactness just how many have had it. This ambiguity is due to several reasons. First in importance perhaps, is the failure of physicians to report all the cases in their care. Many have the disease, especially in the mild form, who never employ a physician and as a consequence such cases do not become a matter of record. It is also difficult to ascertain exactly how many deaths are due to influenza.

Only eighteen deaths are reported as caused by influenza but as is well known, most of the mortality of this disease is due to some form of complicating pneumonia, usually of a bronchial type. Consequently many of the mortalities reported as due to pneumonia are undoubtedly primarily

due to influenza. Is there any way of estimating how many?

In 1917 there were 36 deaths reported from pneumonia. This was more than the average for some years past. However, assuming this to be the normal mortality from pneumonia let us deduct this number from our 1918 total deaths from pneumonia. This number is found to be 186 and deducting 36 leaves 150 deaths from pneumonia that may fairly be assumed to have primarily been caused by influenza. Adding now our 18 deaths reported as due to influenza we have a total of 168 mortalities from influenza. This total is, of course, only an estimate but is unquestionably somewhere near the truth.

If a case mortality of 4 per cent is assumed this would give a total of 4,200 cases or about one in every five of our population. Be that as it may, it is very certain that this plague has taken an awful toll of lives not only from our own community but from all over the world. It is truly a pandemic. It still rages in a virulent form in many far scattered places on the globe, although happily now with us only in the scattered or sporadic form.

Reports of its ravages come concurrently from such antipodal points as Archangel on the White Sea and from Apia in Samoa; from Seattle, Oregon and from Cape Town in South Africa. It is truly a pest and much remains to be learned as to its cause and of the manner in which it spreads. Authorities nearly all agree that it is most probably spread by droplets from the upper air passages. Such droplets are thrown out in coughing or sneezing and experiment has shown that they may be projected a distance of eight to ten feet. Therefore those attending cases of epidemic influenza should wear a mask.

While it is felt that so far as Concord is concerned we are over the worst of the epidemic it must be borne in mind that certain sequellae are yet to be feared, namely: tuberculosis and certain psychoses (mental diseases). These must be given the benefit of early recognition that proper treatment may be given before the disease advances to the

incurable stage. Fortunately the state is well equipped with institutions for handling these cases. In November an "Emergency Health Committee" was formed as an adjunct to the City Board of Health. On this board representation was given to those agencies and institutions which had rendered such valuable volunteer service when the epidemic was at its height. It is the expectation that this committee may serve a useful purpose in some future emergency.

With respect to contagious diseases other than influenza, the city has been quite fortunate during the past year. This is especially true in regard to diphtheria, only 22 cases having been reported.

A new regulation requiring the reporting of venereal diseases has thus far brought reports of only 14 cases. Several of these cases were reported by the United States and State of New Hampshire officials. It is obvious that reports are being withheld. This board asks for the coöperation of physicians in the effort to stamp out these terrible diseases.

Dr. Charles Duncan, who has for many years held the position of milk inspector, tendered his resignation to take effect September 1, 1918. Up to the end of the period covered by this report no arrangements had been completed for carrying on the work. However, in December, a committee was appointed to look into the matter with a view to an early settlement of the question.

The report of the sanitary officer is transmitted herewith and made a part of this report. It should be referred to for a more detailed account of the Health Department's activities.

Respectfully submitted,

MAYOR CHAS. J. FRENCH,
CHAS. H. COOK,
S. G. MORRILL,

Board of Health.

REPORT OF MILK INSPECTOR.

CONCORD, N. H., November 6, 1918.

To the Board of Health:

GENTLEMEN: I herein tender my resignation as milk inspector for Concord to take effect September 1, 1918.

I have property of the department which I shall be pleased to turn over to my successor.

I thank the Board of Health for the confidence they have placed in me since I took up the work in 1910. The Concord milk supply is as good as any, and better than in most cities in the state. I say this not to receive any credit for my part in the work, but as praise for the methods used by the department with a hope for continuance. I feel that inspection is a very important part of the work for clean milk, and that all effort spent on this work nets the very best results.

It would be a paying proposition if material for this work could sometime be made a part of the equipment of the Board of Health. The work requires a trained assistant, but such could be trained by the State Board of Health, and their endorsement would assure the party a state license necessary for milk inspection for the one taking up the work.

I had hoped by this time that the State Board of Health Laboratory might be sufficiently organized to be able to do milk inspection periodically for the cities, and such may be a plan for the future.

This would not relieve the city from the responsibility of having a milk inspector, but would be an important adjunct for clean milk.

I am sure the Concord milk producers, as a class, will assist your board in any plan devised.

I assure you that my interest and help will be freely given to whoever becomes my successor.

Very truly yours,

CHARLES DUNCAN.

REPORT OF THE SANITARY OFFICER.

To the Board of Health:

GENTLEMEN: Herewith is submitted the report of the sanitary officer for the year ending December 31, 1918:

There were 693 deaths during the year, 84 more than in 1917, and pneumonia caused the largest number of deaths, 186, or 27.19 per cent of the total number excluding stillbirths. Estimating the population at 22,000 and excluding the non-resident deaths, 245, and the stillbirths, 10, this gave a death-rate of 19.90. There were 342 deaths at the six public institutions and 351 in the nine wards of the city.

There has been a marked decrease in contagious disease, especially during the present epidemic of influenza, as only 228 cases have been reported to this office with four deaths. The duties of this department have been greatly increased since venereal diseases were made reportable as a War measure and a nation wide movement has been started to stamp out this menace, the effects of which are already becoming noticeable.

Only 1,331 cases of influenza were reported, but there was scarcely a family in Concord who escaped this dreadful malady. The calls for nurses and first aid workers were so numerous, that at times it seemed impossible to find anyone to send out, however we were fortunate in being able to answer the large majority of calls. In many instances I found some deplorable conditions where five and six people were sick at the same time with practically no care; in these cases it was necessary to set up beds, separate the patients and make them as comfortable as possible which I was able to do with the aid of the district nurses.

When it became necessary to open an emergency hospital the use of the Elks' Club was given and a very sanitary, comfortable, and convenient hospital was equipped by the Red Cross. The hospital under the direction of the District Nursing Association and the Board of Health proved

a very efficient way of caring for many cases during the shortage of nurses.

An emergency health committee, adjunct to the Concord Board of Health, has been formed and organized of citizens who did such efficient work during the epidemic, in order that we may be ready to cope with whatever health emergency may arise in the future.

In compliance with the request of the Government and as a War measure the privilege of keeping a pig was allowed in the compact parts of the city. There were comparatively few complaints from the large number that were kept and upon inspection I found the use of a disinfectant advisable.

The usual number of complaints and nuisances were received, inspected and conditions relieved. These complaints were largely due to dead animals, odors from pigs, stables and rubbish, throwing out of slops; insanitary plumbing, refuse and ashes in yards and general condition of premises. The usual weekly inspection of alley-ways in the rear of the business blocks has kept them free from objectional rubbish.

Ninety-four milk farms were inspected and the majority were found in excellent condition. When necessary, improvements were suggested and on second inspection I found the requests were complied with.

There has been practically no building during the year as only thirty plumbing permits were granted and fifty-eight water tests were made.

Upon inspection of the public halls it was requested that the toilet rooms and halls be kept in a sanitary condition.

The water supply at Long Pond has been inspected from time to time and conditions were found to be excellent. Analysis shows the city's water to be very satisfactory.

The appropriation for the year was \$3,700 and the total expenditures were \$3,446.82 leaving a balance of \$253.18. The price of fumigation supplies again shows a material advance. During the epidemic there was a shortage owing to the unusual demand but we were very fortunate in having sufficient supply on hand to meet our needs. In the care

of contagious disease \$594.22 was expended; most cases requiring assistance by this department during quarantine were cared for at the Foster Ward, Margaret Pillsbury Hospital.

One hundred and eighty dollars was received from milk license fees and \$24.75 from the sale of fumigation supplies.

The following tables show in detail the work of the department.

REPORT OF JOHN KIMBALL PLAYGROUND.

To the Board of Aldermen:

The season of 1918 has been unusually successful on the John Kimball Playground. A visit to the playground on any Tuesday, Wednesday, Thursday or Friday afternoons in July or August will verify this statement. The children of that neighborhood enjoy fully the privileges of the victrola, the folk dancing in the little pavilion, the games, the dressing the doll, the Red Cross work, the volley ball games, the sand pile for the little ones and the tennis court for the older ones. Miss Marion Silsby presided over the varied interests of the playground most acceptably, preserving discipline with ease and efficiency. It is remarkable what harmony prevails during these afternoon classes and a more orderly group of children would be hard to find. The doll, named Elizabeth Kimball, and her dainty outfit were given to the children at the Bethesda Home at Rumney, N. H.

Francis O'Brien had the care of the grounds and the general supervision of the apparatus.

It would be a great benefit to the playground if more apparatus could be purchased, if a wading pool could be built and more seats and awnings for the hot summer days. More supervision in sewing, basketry and sloyd would be beneficial. In fact, the establishment of a summer school for vocational training could be well undertaken on the playground.

REPORT OF COMMITTEE ON THE SOUTH END PLAYGROUND.

To the Mayor and Board of Aldermen:

The committee respectfully submits the following report for the year 1918.

The \$500 appropriated for the current expenses of the playground has been expended by your committee with an aim to give a variety of interests to the community which might be shared by a large number.

The tennis court which has been in constant use was repaired and a second one started.

Miss Marion Shepard, our efficient supervisor, was with us again this season and her services are highly appreciated by this committee as well as by the children.

We paid special attention to our war gardens this year and placed this department in charge of Miss Luna Burbank. During July and August, canning classes were held twice a week for a period of two hours; 106 quarts of vegetables from the gardens were canned.

The Fourth of July parade and sports, and the exhibition held on the grounds on Field Day proved the interesting features of the season.

REPORT OF CITY PHYSICIAN.

To the Board of Mayor and Aldermen:

I have the honor to submit the following report of the work of the city physician for the year ending December 31, 1918:

House calls on city poor,	155
Office calls on city poor,	36
House calls, Board of Health,	32
Office calls, Board of Health,	17
Vaccinations and Examinations,	145
Operations performed,	2
Cultures taken,	65
Times antitoxine given,	4
School children inspected,	200
Calls at police station,	11
Investigation trips taken with police,	1

In addition to above the city physician has served as secretary of the Board of Health, attending practically all of the meetings of the board. He has also been in frequent conference with the sanitary officer and the other members of the Board of Health.

Respectfully submitted,

CHARLES H. COOK,
City Physician.

CONCORD, N. H., January 29, 1919.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

To the Board of Mayor and Aldermen:

The following is a report of sealer of weights and measures for the year ending December 31, 1918:

Scales tested and sealed,	240
Scales tested and condemned,	12
Scales tested and condemned for repairs,	8
Scales adjusted,	59
Weights tested and sealed,	957
Weights tested and condemned,	6
Weights tested and condemned for repairs,	15
Weights adjusted,	20
Dry measures tested and sealed,	27
Liquid measures tested and sealed,	96
Liquid measures tested and condemned,	5
Tape measures tested and sealed,	1
Yard sticks tested and sealed,	6
Gasoline pumps tested and sealed,	3
Gasoline pumps adjusted,	1

NOTE.—The reason this report shows so few gasoline pumps tested is because all of these pumps were tested by the state of New Hampshire officials in 1918.

In many cases the local sealer was present and assisted in the work

Berry baskets tested and found correct,	34
Packages weighed,	89
Found correct,	58
Found overweight,	30
Found underweight,	1
Piles of wood measured on request,	3
Found correct,	1
Found overmeasure,	1
Found undermeasure,	1

This last mentioned pile of wood was bought for one cord. On measurement it was found to contain $67\frac{5}{8}$ cubic feet instead of the 128 cubic feet it was supposed to contain. The seller of the wood was prosecuted for violation of the weights and measures law. A conviction was secured in the Municipal Court. An appeal resulted in the case being tried before a jury. The jury brought in a verdict of guilty. The local sealer appeared as a witness in both of these trials.

Twenty-six loads of coal were stopped on the street and asked to go to a scales (usually the City Scales) for reweighing.

Of these 26 loads 12 were found to be correct weight, 8 were overweight, and 6 were underweight.

The overweights ranged from 20 to 160 pounds with a total of 480 pounds. That is, these eight buyers received 480 pounds of coal more than they paid for. The underweights ranged from 20 to 50 pounds with a total of 170 pounds. That is, these six buyers received 170 pounds less than they paid for.

On the whole it would seem that these figures tend to show that our coal dealers intend to give correct weight.

Respectfully submitted,

CHARLES H. COOK,
Sealer of Weights and Measures.

REPORT OF THE CITY SOLICITOR.

CONCORD, N. H., January 17, 1919.

To the Mayor and Board of Aldermen:

I submit herewith my report to the board relative to legal matters in which the city was concerned during the past year.

Concord Manufacturing Company v. Concord was a petition for the abatement of taxes on plaintiff's mill, situated in Ward 1. In my last report I reviewed the progress of the case before the Tax Commission and Superior Court and stated that there was a likelihood that the petition would be withdrawn. That has subsequently been the case and I have had the action dismissed in the Superior Court. The original petition claimed that the property of the plaintiff was overvalued for the purposes of taxation more than \$50,000. The petition for abatement had reference to the tax assessed in 1914. That tax was paid under protest so that the city has had the use of the money. Since the year 1914 the company has paid on the valuation fixed by the Board of Assessors.

Hammer v. Concord was a petition for the abatement of taxes assessed upon the plaintiff's residence, as was *Collins v. Concord*. Hearings were had in these two cases before the Tax Commission and rulings were made in both cases by the Tax Commission in favor of the city. Subsequently I had the cases dismissed in the Superior Court.

In my last report I outlined the proceedings in the gas rate case up to that time. Since then the Gas Company has secured certain increases with which the board is familiar.

Another matter before the Public Service Commission in which I represented the city was the matter of increasing the rates of fares on the street railway. On the showing made by the company I recognized that additional revenue was needed by the company to pay fair wages in addition

to its fixed charges. I did oppose, however, the charging of two cents for transfers and in a measure was successful before the commission in this contention. While two cents is to be charged for transfers in certain cases the largest number of people having occasion to call for transfers will not be obliged to pay the additional two cents for them.

Frank E. Tyrell has brought suit against the city for the death of a horse which he alleged was injured by reason of a defective bridge on the Shaker Road. The amount claimed is \$400, and the case will be in order for trial at the spring term.

Herbert A. Goodwin through his counsel, Nathaniel E. Martin, has presented a claim against the city for \$392.90 for injuries to his automobile at a culvert on the South Pembroke Road, July 28, 1917. When Mr. Martin spoke to me about this matter I asked him to furnish me an itemized bill which I would send to the board. This was done and I arranged with the Committee on Accounts and Claims to proceed to the place where the culvert was located for an inspection. The date was set for the inspection but before that date arrived a considerable fall of snow had covered the location and made it inadvisable to make the inspection until spring.

During the first part of last year in accordance with the ordinance prescribing my duties I revised the ordinances up to date and furnished the members of the board with annotations to be inserted in their copies of the 1912 ordinances.

The Legislature is now in session and I shall enter my name as a legislative agent for the city and inspect all bills introduced in the Legislature to see if the city is in any way concerned. I will report to the board from time to time any bills that have been introduced if it seems necessary to bring such bills to the attention of the board.

Respectfully submitted,

ALEXANDER MURCHIE,
Solicitor.

ASSESSORS' REPORT.

To the Taxpayers of the City of Concord:

The Board of Assessors submit to your consideration the following facts and figures showing the valuation of the city and its school districts and special precincts, with the amount of taxes raised in each and returned to the tax collector for collection.

There are no matters of appeal from taxation by this board now pending before the court.

In the following report is a table of the amount raised for the years from 1908 to the present time, which shows the increased amount spent by the city and the reason for an increased tax.

IN MEMORIAM
JUDGE ALLEN CHESTER CLARK
Died September 23, 1918.

REPORT OF THE MUNICIPAL COURT.

To His Honor, the Mayor, and the Board of Aldermen:

I am transmitting herewith a statement of the receipts and disbursements of the Municipal Court for the year ending December 31, 1918, prepared by Mrs. Henrietta P. Stanley, clerk pro tem of the court.

This statement, however, does not include money received by the court in non-support cases and disbursements for the benefit of dependents, and the importance which that work assumed, under the direction of the late Judge Clark, renders a detailed statement of such receipts and disbursements of interest.

The following figures show the amount of money handled by the court, in this way, during the current year to have been nearly double that of the preceding year.

NON-SUPPORT.

In the untimely death of Judge Clark the community has lost a loyal citizen, the bar of the city a useful and respected member and the Municipal Court a painstaking and conscientious justice. He administered the affairs of the court with absolute impartiality and fairness, and gave much of his time and thought in dealing with the problems which

arise out of the domestic relation. He was a close student of criminology and was ever ready to render assistance to the unfortunates who came before him.

Respectfully submitted,

HARRY J. BROWN,
Justice.

REPORT OF THE CEMETERY COMMISSIONERS.

The work at the cemeteries varies but little each year—care of the grounds—grading new sections as needed, making the interments as they come. The interments have been 270, the largest of any single year. The chapel has been used 12 times. No new sections have been graded. One section has been regraded to be known as the “Perpetual Care Block” the price of lots as sold to be sufficient to make them for “Perpetual Care Lots.” A larger appropriation is needed for Blossom Hill Cemetery, as the work increases each year, and the increased cost of labor and materials add largely to the year expenses, and the income has been very prudently used the last year.

The cemetery has been presented with a beautiful granite monument with a statue by Mrs. Mary C. Cummings, as a memorial for her late husband, Hon. George A. Cummings, who was for several years mayor of the city, and with the desire to add to the beautifying of the cemetery.

The expenses for the year have been \$12,109.80. The income from the various sources has been \$11,259.20, leaving a deficit of \$850.60. The Old North and Minot cemeteries have both been kept in their usual excellent condition. There have been 18 burials the past year. The income from the various sources has been \$767.21 and the expenses \$753.19, leaving a surplus of \$14.02. The building of a new fence is a matter that cannot much longer be delayed with safety.

BLOSSOM HILL CEMETERY RECEIPTS.

One-half of the receipts for the sale of lots is added annually to the permanent fund. The remaining half, with the amount received for grading of lots sold, together with the amounts received from sundry collections and income of permanent fund, are added each year to the annual appropriation. The amounts expended on trust funds are paid on a special order from the mayor from the income of individual deposits made with the city for that purpose, said income being used exclusively for the care of the lot specified in each trust.
